

Drum Clamps

Drum Clamp - Forklifts are utilized to handle lifting, storing and moving pallets. For facilities that handle products inside drums, you should utilize an attachment to be able to move, lift and store them. There are various drum forklift attachments that you could obtain for all your drum storing and moving requirements. These attachments are specifically used in order to deal with drum containers - thus there is no chance of damage to the item or drum container whenever they are stored, moved or lifted.

Drum Positioner And Grab

The drum positioner could be used to load and unload drums off of drum stands, vehicles and racks. These are offered in three or four tine models. This attachment is totally automatic, hence allowing the individual operating it to operate all from the comfort of the forklift seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This accessory is meant for drum pyramid stacking.

The drum grab can be mounted to the forks, with a designed purpose of dealing with steel drums which have rolling hoops. Even if the initial purpose for the design was to handle steel drums with rolling hoops, the drum grab could help accommodate plastic drums also. Drum capacity maximum is 210 liters for steel drums with rolling hoops and 220 liters for plastic drums.

The Rotator

The drum rotator is actually a forklift attachment that mounts on to the blades themselves. The purpose of the drum rotator is to be able to lift the drum and turn it upside down. The drum fits in to the rotator with a steel clamp that fits over the center of the drum. The rotation is done by either a crank handle or a continuous loop chain. The crank handle is used for operations which occur beneath shoulder level. For operations which should take place over shoulder level, the continuous circle chain will be used.

The drum tines are simple fork or carriage mounted attachments. They are intended for unstacking and stacking 210-liter steel drums. Stacking involves nothing intricate, just easy horizontal positioning of the drums. The carriage-mounted accessories decrease the load center of the drums.

Automatic Tongs

Drum tongs are obtainable both automatic and semi-automatic models that can be utilized in the tight head and open topped steel drum styles. The drum tongs can likewise be attached several different ways to the lift truck. One method is to attach them underneath a fork-mounted hook. One more way is to connect them to a fork-mounted jib or a carriage mounted jib. Either the automatic and semi-automatic have a drum capacity of 210 liters. With the automatic, there is no requirement for the operator to ever leave the seat of the lift truck.

Rim Grip Handler

Whenever drums need storage with limited area obtainable, the Rim Grip Drum Handler is the perfect option in drum forklift accessories. This attachment would work for either the two hundred ten liter drums along with one hundred twenty liter drums. The Rim Grip Handler works by using steel jaws in order to grab the rim of the drum. It picks the drum up and puts it down without needing any space between all of the drums. The average model in the business is a zinc-plated handler, even if, this attachment comes accessible in stainless steel for the food and drink market.
