

Advance-Nilfisk Parts

Advance-Nilfisk Part - Think about how long and tedious it will actually be to tidy up after a party, with no assistance from equipment. Not too long ago, the dirt from upholstery and carpets had to be beat out of them by hand; brooms, brushes and cleaning cloths were the top cleaning products during that time.

P.A. Fisker, the man who established Nilfisk-Advance, was actually an electrical engineer who loved working with electrical motors. Establishing the company in 1906, he began to produce motors so as to drive fans, machine tools, coffee grinders and drills. Mr. Fisker's dream from the start was to have a global business advertising products globally.

The Nilfisk C1 was an incredible breakthrough for the cleaning business. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed just 17.5 kilos and can be operated by a single person. This creation came in a time where other cleaning machines were massive and required at least 4 operators, therefore, the Nilfisk C1 transformed everything and evolved the way we clean forever. The brain behind these very first cleaning machines remains unparalleled. Cleaning machines provide a brilliant solution to an ongoing crisis; stuff get dirty and should be cleaned on a regular basis, without too much effort.

Slowly but progressively, Nilfisk-Advance grew all through the decades. In the 1980s, this development really happened when the company became a part of the NKT Group. Their new owners' ambition and motivation made Nilfisk-Advance take a huge leap forward within the industry, aspiring to be among the largest global players in the market of professional cleaning machines. Nilfisk-Advance is now located in every part of the world by steadily acquiring many small companies so as to develop their product selection and presence in new markets. They are proud to offer a range of cleaning solutions to suit each and every requirement.
